### Summary

This is to fix a curtain to a wall, with the ability to add whatever attachment/ornament you would like.

Tags: [curtain](#) [hook](#)

I needed a quick fix for our old bedroom were right now renovating.

So i designed a hook in Fusion 360, together with a pin system so it doesnt rotate with only one screw.

(You basically drill a 3mm diameter hole right next to the hole for the screw, and either print a pin or take a toothpick)

Also my gf wanted kind of a finish for that, so i made a flat portion at the front, where you now can just put on what you want.

For the first test, i took the flower from Hex17 ( <https://www.thingiverse.com/thing:2398010> ) and cut the bottom portion to have it easier printed, and made a cut in the middle to paste the middle part in a different colour.

Happy printing! \o/
