Summary

A set in place tray for ALTOIDS mint container

I found an ALTOIDS container so I decided to make storage for the few nozzles replacements I own. I designed it to my needs: 4x 0.4mm nozzle slot, 2x 0.6 nozzle slot, and 2x old nozzle slot. There is an STL file for this, however, I have also included a STEP file for anyone who wants something a little different. You could add more nozzle slots, different nozzle labels, etc. You can also scale the model if you want it to fit in a bigger ALTOIDS container.

Happy Printing;)
