

E3D Revo Nozzle ADXL Mount with larger holes

 **contrapuntal**

[VIEW IN BROWSER](#)

updated 7. 8. 2022 | published 7. 8. 2022

Summary

Revo/ADXL Mount with enlarged holes for ABS

[3D Printers](#) > [3D Printers - Upgrades](#)

Changes:

- The main hole was enlarged slightly for an ABS print so that the nozzle can be screwed in more easily.
- The heat set insert holes were enlarged for M3x5x4 heat set inserts (Voron BOM)
- STEP file included - I created this from scratch.

BOM:

2 x M3x5x4 Threaded Heat Set Inserts

This was tested on a Voron V0.1
