Summary

I made this to print with other projects for mounting purposes hence the alignment slots on top

0.53 hrs

1 pcs

0.20 mm

0.40 mm

PET

5 g

Prusa
MK3/S/S+

[Gadgets](#) > [Other Gadgets](#)

I personally used PETg at 0.03 draft settings with 20% grid infill on most of my models but that's mainly because I printed my test pieces with a Bose aviation headset controller holder i made which mounts with this clip glued on the back, i need to fine tune the holder a little as removing it from the clip might not be possible just yet. Aside from that it fits very well and seems to retain its shape for a good connection on the mount
