A Battletech Hex Base designed to look like the floor of a 'Mech Bay. It comes in six variations; as a complete base with plain sides, as a complete base with textured sides (and a front-side mark), and as a "hex chip" that allows it to be inserted into a metal hex base for those who prefer the weightier bottom that provides.

Also included are small "rails" that can be added to the bases.

This is a free sample of a set of 7 variants that can found at my new Etsy store as downloadable STL files: https://www.etsy.com/listing/628149609/3d-printable-mechbay-hexes-for?ref=shop_home_active_1

UPDATE: Argh! I just realized I had included the barrels instead of the rails. Well, its my bad so y'all get both.
