### Summary

The simplest airtag mount out there! Just snap the tag on and attach to whatever!

0.20 hrs

1 pcs

0.15 mm

0.40 mm

PLA

3 g

Elegoo  
Neptune 2

[snap](#)

I designed this model to be super simple and easily customizable. I saw other models out there that were for very specific purposes, but I designed this to be very different. Anybody with some design skill can easily create an attachment for this mount for their own needs. I also included a small hole in the center so that you can screw an M3 bolt to attach this holder onto anything. (The white disc in the photos is the airtag model Prusa recommended)

Settings:

0.15 layer height

no supports

100% infill

3 walls /shells / perimeters
