Stand for the **Kemper Profiling Amp** "toaster" guitar/bass amplifier.

This stand tilts the amplifier up or down 12 degrees, giving more flexibility in placement.

- Tilt down for shelf above your eye line.
- Tilt up to put the Kemper atop an cabinet or low shelf

Use at your own risk! If you yank the KPA by a cable, it will still come tumbling down :)

Laser cut the DXF out of 1/4 plywood(you will need to offset for your laser kerf), or print on a very large printer
