updated 7. 8. 2022 | published 7. 8. 2022

## Summary

A three part panel to mount switches in place of the ash tray.

[Hobby & Makers](#) > [Automotive](#)

This is a three part panel that uses #10-32 screws and captured nuts to hold on the faceplate. This allows for easy access to the switches and wiring. Print the brackets mirrored and one face panel. Or cut the face panel out of wood, aluminum or carbon for a more rigid and long lasting part. The panel is sized for the Carling rocker switches and the standard Amazon round power plugs / USB ports.
