Summary

Yet another planter for planting plants

[Household](#) > [Home Decor](#)

Tags: [flowerpot](#) [planter](#) [pot](#)

It's time for another planter!

Meant to be printed with very wide layer width (here: 1,2mm nozzle, 2mm line width, 0,6mm layer height) and in vase mode. Also increase flow rate to make it watertight.

As for the inner part, I recommend drilling a few holes for the excess water to run off.

Printed in Reprapper Copper PLA.
