I had some issues with higher power brushless motors stripping out the inside of the pinion gear. Designed this so I could use a standard metal pinion instead of the printed versions of gear_1 and gear_2. <https://www.printables.com/model/447947-chassis-110-adaptable-dks-basic>

This utilizes a Traxxas 3956R spur, and any 32p pinion.

Print Settings

Printer Brand:

Prusa

Printer:

I3 MK3S

Rafts:

No

Supports:

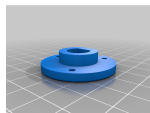

No

Notes:

I'd suggest doing more vertical shells, I did 4.
