Summary

It's a luggage tag for an AirTag! Prints quickly and leaves space to write out your info the old fashioned way.

Tracking luggage when traveling has always been one of the use cases for AirTags that made the most sense for me. I wanted my AirTag to be outside the luggage and I also wanted to be able to have my contact information printed on the tag.

This model accomplishes that with a two-piece design that slides together to secure the AirTag. I use a key ring to keep the parts from separating and to attach to a zipper of the luggage. Critics have questioned the durability when faced with rough handling, but I have used this on several trips and it shows no signs of wear/damage.

Printable without supports.
