[spicerack](#)

a simple and small shelf / rack to store our spices underneath a wall cabinet in our kitchen

mount it to the top or to the wall, add several units for longer shelves (one unit for two spices is 158mm long)

ideal for Ankerkraut spices :)

connectors on the side secure multiple units together

an angled area in the top lid can be equipped with an LED strip to illuminate the spices

I used this one with adjustable color temperature from [Amazon](#).

printable with almost no support (laying down on the wall side), only a small strip for the side connectors, I printed it with 0,3mm, worked fine

I added Solidworks and Step files, if you want to remix it

Have fun,

Sebastian
