It is a remix of [joei92 Tupperware Lid Mount](#) on thingiverse. The few changes that I made are to round some of the edges, make it easily printable on its side (no supports) and fit the holes for the screws to the screws that I had (17mm x 2.5 with countersink). It fits perfectly 21x15 cm lids. Have not tested it with other sizes.

Printed on Prusa Mini+ 0.2 Quality preset in PETG, with 30% infill, honeycomb pattern. Take care when screwing to the the cabinet door, as the holes can snap in two, if screwed too tightly. Or try print with 100% infill.

Happy printing!
