Two part print that prevents your door handle from smashing into the wall and also prevents the door from closing itself. The screw holes have a diameter of 4.5mm The height of both parts combined is about 11cm, which still leaves some space between my door handle and the wall, so it should work for most cases.

### Print Settings

#### Printer Brand:

Prusa

#### Printer:

i3 MK3

#### Rafts:

Doesn't Matter

**Supports:**

No

**Resolution:**

0.15

**Infill:**

10%

**Filament:** Prusa PETG Black

**Notes:**

I printed this in PETG, but it should also work in PLA. Resolution shouldn't matter too much, as long as the screw holes look ok.

Category: Household
