### Summary

Simple print to unlock supermarket carts that need a € coin. Allows the tool to be pulled out once the cart is unlocked

I wanted to learn how to use Fusion 360 and decided to do an improved version of my supermarket coin thing. This version is more durable and a bit easier to pull out of the cart after using it.

The stl is sized for a 1€ coin.

Due to it's low height it can also easily be printed sequentially using Slic3r. (See the second picture, where I printed 6 of them sequentially on my Prusa i3 MK3)

### Print Settings

#### Printer Brand:

Prusa

**Printer:**

i3 MK3

**Rafts:**

No

**Supports:**

No

**Resolution:**

0.2

**Infill:**

100%

**Notes:**

The resolution doesn't really matter too much. I set the infill to 100%, so that the part is a bit more durable.
