This is an accurate recreation of the Prusa MK3 POM TR8x8 and probably other printers (other ones I tried from thingiverse didn't match the lead pitch). I print them in PLA and use them in a MK2 clone I have lying around, they work perfectly fine, they just wear way quicker than POM ones.

**NOTE:** Fine tune your extrusion multiplier before printing this, the inner diameter is exactly 8mm so a little over-extrusion and it will be too tight.
