A dual-color remix of tomasf's design! I printed mine white with red stripes. I don't have photos to show because after I printed it, I used it for a while, and it ended up cracking a little. It works and looks great, though! Anyone who is looking to add some visual appeal to their phone should definitely print this.

Print settings:

0.15 layer height

100% infill

no supports

This remix is based on

iPhone 7 snap case
