Summary

Remix of PanzerObserver cover for another camera model than the Waveshare 15301 OV5648 5MP

[3D Printers](#) > [Accessories](#)

Remix for PanzerObserver (https://github.com/Slidr666/VoronUsers/tree/18599db8c29c9a272f852d1dac9ad5d014d0a496/printer_mods/Slidr/PanzerObserver2.4) cover, to house a different model camera (<https://www.aliexpress.com/i/32898413562.html>)

Removed the extra hole from original, it doesn't seem to serve a purpose for my model. Moved the camera opening 2 mm to the other direction. Widened the inside indentation for the connector. The rest is same, refer to Github for the rest and instructions (print the insides pointing up, not like in the picture and file, no supports required)

I don't think I would recommend this camera module, it runs hot and the image quality is so-so.
