Summary

A replacement for the mounting bracket on the CoolerMaster LC240E.

Tags: [cpu](#) [aio](#)

My original mounting bracket broke when torqueing the mounting screws the first time. This model is a replacement that held together when torqued.

Print four of the mounting clips as you need one for each screw. I recommend printing with ABS to avoid warping.

I can only confirm that this fits the LGA 1151 socket, but may fit earlier intel sockets.
