Summary

This GoPro adapter allows you to mount any legacy camera to a GoPro mount.

Tags: [camera](#) [gopro](#) [mount](#) [screwcap](#) [threaded](#)

Most cameras or tripod mounts use a 1/4"-20 screws. By using a lock nut you can tighten the camera on the adapter. I used M3 threaded inserts and M3 hex colts to capture the 1/4-20 screw in the middle of the mount and recessed so that it cannot turn. The hole in the adapter is for a tether cord. Since I will use this on a jet ski with a kodak action cam I wanted to give it a safety tether.
