This is a adapter for bushings, eg. broncebearing.  
I've paused the print at 19.75mm and inserted the broncebushings, then resumed printing.

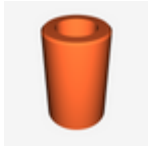

I used <http://prusaprinters.org/color-print/> for that.

make a few tests while adjusting the inner diameter of the adapter, be sure the inserted bushing fits in tight!

### Print instructions

Pause print at 19.750mm (better check the height in your slicer!), insert bushing and resume printing.
