V2 Now Out!!

Clip-on style Micro SD Card Holder for the Anycubic Kobra Series.

This one hold 3 Micro SD Cards and there is a 6x version also.

Now hold more cards and has a "slot" to prevent hitting the inserted "Active" card.

NOTE: Due to the ambient heat from the bed, the Clip may slide. I added a little double sided tape to the inside top and it's solid for a year now.

Print on Side ( "W" up) - no need for support

### Print Settings
