Tags: [airtag](#) [antitheft](#) [appleairtag](#) [legobrick](#) [legocompatible](#)

Are you struggling with the theft of your precious building blocks? Does your wife steal them so she no longer is in the backseat of your life?

Well, I have the solution for you!

Try out this new apple airtag compatible building block. It can be built into your favorite models so if they go missing, they can be tracked. It is the same size as a 4x4 brick.

There also is a keychain version available if you simply like the appearance

### Print Settings:

I printed these with a 0.12mm layer height with the studs facing upwards using support
