updated 8. 8. 2022 | published 8. 8. 2022

### Summary

I was tired to have the laptops on the table, even if I was no using them. So I created a support to fix them.

I was tired to have the laptops on the table, even if I was no using them. So I created a support to fix them.

The big one is used to fix a HP Z Workstation laptop (bigger and heavier) the other one is to fix a Lenovo Ultrabook, much more lighter.

I reccomend to print the parts as shown in the picture to increase resistance and use a good fill, nobody wants to pick a laptop from the floor. The fixations are up to you, I use wood screws directly to an IKEA table.

Regards,
