[xiaomim365](#)

A replacement rear wheel nut cover that also fits an AirTag.

Fusion 360 file is provided so it can easily be adapted for newer Xioami scooters.

Print in picture was printed with 0.6mm nozzle and PLA. If scooter lives outside, PETG or other more weather resilient filament should be used.

Proved itself useful as I could track it when it was stolen and eventually got it back. The thief's did search for it and removed a few things looking for it, however they did not find it. When I got it back it was washed and the controllers firmware was updated.
