This slicer cuts dough into 25 1 inch square sections. The thin side is the cutting surface, the other side is thicker for strength and for a good surface to press when cutting. I used 25% infill, and built from the thick side up with ironing enabled.

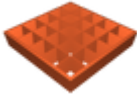

I used PrusaSlicer's default PETG profile except for these tweaks meant to reduce stringing:

- Nozzle temp: 235C (all layers)
- Retract length: 1.3mm
- Retract speed: 55mm
