updated 9. 8. 2022 | published 9. 8. 2022

Summary

It holds the 2 main pieces of the AeroPress and the scoop. You can rest the funnel in the one tube.

The first useful model I made. I don't like storing my AeroPress with the tubes inside each other because my first AeroPress' rubber got damaged that way.

I used tinkercad. I printed mine with too few walls because I was impatient. I also needed to glue the legs in. yours might snap fit if your printer is dialed in well. It holds the 2 tubes, the main tube can be left with the cap on and the funnel can be held in the other tube. there is also a slot for the scoop and paddle. There isn't a place for the filter holder.
