⚙️ **Why one could need them**

I use these dust protections for my measuring cylinders. The cylinders are used to create mushroom tincture. If you are interested, I have a lecture series on how to grow mushrooms indoors at home!

⚙️➔ **General Overview**

In this lecture series I will teach you how to grow mushrooms! This will include agar-spawn in petri dishes, grain-spawn in jars, wood-spawn in plastic bags and fruiting conditions. For all these steps I will provide the needed recipes that I have successfully used and include procedure videos.

I will also show you, how to set up a growing system. The system is based on a grow tent (Martha) and includes humidifiers and air waterproof ventilation. An easy to build DIY controller board will be used to regulate the humidity, light, and the air flow.
