Summary

My version of the non-standard Brio compatible "H5" cross track.

[Toys & Games](#) > [Building Toys](#)

Tags: [brio](#) [briocompatible](#) [briotraintrack](#) [woodentrack](#)

This is my variation of the standard Brio compatible "H3" cross track.

It varies in that the two curved tracks do not fully intersect. Thus the train can not switch from one path to another, but must continue on it's own path.
