Minimum design. Put the airtag inside - click. Hide anywhere when using two ties. Secure your bike or car.

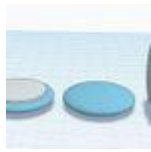

The model is designed to hide the airtag anywhere. You can easily attach it to almost any place using cable ties.

The model has two sides. On the one hand, you can insert an airtag. Skip AirTag Anywhere with two ties for added security.

Printing - 0.2 is enough - PETG will be more durable.

ps. be understanding - this is my first model;)
