A Giraffe, modified Voronoi Style

Print it in yellow and fill it with brown paper (or a brown colored napkin).

And please post a picture of your printed giraffe.

Here is a animation of this thing done in blender: <https://www.youtube.com/watch?v=oAeKn1dQA6M>

Do you know other models who would look cool in voronoi style?

Please leave me a comment!

EDIT 2013-09-13: I have added an other STL with the same Voronoi, but a bit thicker and hopefully easier to print.

EDIT 2013-09-18: I have added two more STL files. Both with support structure below the chin of the giraffe: One STL has only a small support structure, the other one is a bit thicker.

Category: Sculptures
