### Summary

This case is specifically build for the Dirtywave M8 in combination with the 5000mAh slim battery of TNTOR.

The Dirtywave M8 is a music tracker powerhouse. On its own it's a piece of art. The downside of the device is the small battery. You can easy fill it up with a power bank. But why not combine the two. The device will get a bit more bulky but it fits the power bank and the M8 nicely together, and it will add some extra protection.

To let the battery sit snug inside the case I added a small piece of velcro (the soft part) inside the case (or on the battery, whatever you prefer)

UPDATE: Added the v4 variant, it has some minor cleanup + some extra peek holes to view the battery level. The printing direction changed to upright, and probably needs a bit of support. This way you get much cleaner curves on the back of the case.

Printed in PETG on the Prusa i3 MK3+. Quality 0.20 profile or you probably get some printing artifacts on the bottom curves.

TNTOR Power Bank 6mm 5000mAh:
