Tags: [dig](#) [diguno](#) [led](#) [quinled](#)

Snap together, wall mountable case for the QuinLED-Dig-Uno LED controller. Hole for external wireless antenna. Board is held in place in case by snapping lid in place. No screws are needed to secure the board in the case, but screws can be used to secure the case to the wall or other surface. Can also be mounted with glue or double stick tape. Hole in lid for external WIFI antenna, but can also be used with internal WIFI antenna. May need a remix for boards with RJ45 hard wired network connector.
