I was waiting in line for a public restroom on Canada day this year, staring at that little guy on the door, wondering if he's ever tried to escape his 2d, rectangular prison. I came to the conclusion that he had and was so far unsuccessful due to lack of support. He just needed a little help.

Assembly and notes:

- Each sign requires 12, 5mmx3mm neodymium magnets

The magnets should be put in before the sign is assembled

The character will need to be superglued to the white back and the white back will need to be superglued to the colored back.
