This is a remix of the [Bicycle Seat for Doll](#), the seat is great, but the system to fix it to the bike did not work for me, so I designed a new one.

Instead of a long piece that would require support to print, this version uses a 10mm wood dowel, the piece to fix to the bike uses just two tie-wraps. You still need to print the original seat (I printed a shorter version because of the small print volume of my printer).
