Märklin Alpha compatible module top. This cover should be compatible with the short (5 cm) modules. Märklin Alpha was a line of science-fiction, H0 scale, toy railways produced by Märklin in the 80s.

The vents come from the Vents / grills / louvres for scratchbuilding/kitbashing 1/60 scale robot models project.

Print Settings

Printer Brand:

FlashForge

Printer:

Adventurer 3

Rafts:

Yes

Supports:

Yes

Resolution:

High

Infill:

15%

Filament: Flashforge PLA Red

Notes:

Printing vertically gave beautiful texture, but ultimately failed twice as the base moved. Printing flat gave a lot of rafts, I got an OK output printing it at a 30° incline, but still a lot of rafts to cut.
