Summary

I wanted to mount the case side ways, so I made my own mount. Drill bit needed!

I wanted to mount the case side ways, so I made my own mount.

BOM:

- 1x M5 threaded insert
- 2x M3 threaded inserts
- 2x M3x10 screws
- 2x M3 washers
- 4mm drill bit
- drill

Instructions:

- You need to drill the holes with a drill bit. Just hold on the pole and mark the holes through the M3 threaded insert holes.

If I receive the STEP files of the case I will post a full remix.

Update: I added a flat mount version if you don't have the inserts.

I would be happy to see some of your makes posted :)

Source files in the Alibre Atom format is available but the website does not allow the upload. If you need it send me a message.

This remix is based on

3DR - RepRapDiscount Full Graphic Smart Controller case
