The game just ships with a bunch of ziplock bags that are too small, and is a pain to set up and put away. This just makes the game so easy to set up, play, and put away.

I designed it to use as little filament as possible, as it is a large print. It has the cutaways at the bottom, so make sure you have your bridging settings configured properly to ensure a successful print. If you aren't super familiar with those slicing techniques I recommend using the GCODE I provided.
