I made a set of the boxes by rafalmag before realizing that all my jigsaw blades are U-Shank, not T-Shank. While redrawing the box in Fusion 360 for U-Shank blades, I created a sleeve for each size box since I thought they would be easier to store in the tool box without the bolt.

I have included two sizes, 93mm and 110mm long (tray length) which should accommodate most blade lengths. There is a slight raised area, just like on the original version, that keeps the tray inside the sleeve. It was left a tight fit so you can slightly sand the raised area to adjust the retention to your liking.

### Print Settings

#### Printer:

Railcore II Custom

#### Rafts:

No

**Supports:**

No

**Resolution:**

.20

**Infill:**

15%

**Filament:**

Sunlu PLA+ Category: Tool Holders & Boxes
