Update 2023-10-23

After having used it for a while, I do not recommend using this model anymore as it limits the z-axis range. Use with caution.

It's inspired by "[Ender 3 Tool Holder](#)" by [korneelverraes](#).

I liked it's design but since it's license under "Creative Commons: Attribution - Non-Commercial - No Derivatives" I can't remix it. So, I created my own tool holder tailored for my needs. I've removed SD card adapter groove and changed pliers suport to a simple hole. The last may be the worst change I've made and deserves more work.

Thanks to [korneelverraes](#) for inspiration.

If you like it, don't be shy and let me know. If you ever print it, I would appreciate any pictures you could post.

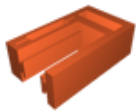

Print Settings

Printer brand: Creality
Printer: Ender 3
Rafts: No
Supports: No
Resolution: 0.28
Infill: 20% - cubic
Filament material: PLA+

Post-Printing

Eventually, it needs some sanding to snug fit in place.
