Hiya!

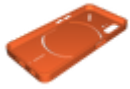

This is a printable Bumper case for the Nothing Phone (1). I wanted a case for it but couldn't find any available at launch so I just made one ;)

This is designed in a way that's a little on the thick side. But has cutout's for the backlighting on the underside of the phone to shine through, so where ever you are. You can still see all your notifications and everyone can see your impromptu outdoor raves when playing music.

Enjoy!

The print i did for my phone was printed using the Alpha Prusa slicer with Arachne and using the adjustable layer hight setting. But printing at 0.3 and with ASA filament.

Model files

np1-mk9-final-bumper.stl

☐ Bumper case with volume divider

np1-mk9-final-l-vol-bumper.stl

☐ Same shape of case but with no Vol Divider

np1-mk9-final-both-styles.stl

☐ Both on the same plate!
