### Summary

a replacement for the easily-damaged end caps on the main frame pillars of the FLSun Super Racer

Tags: [flsun](#) [flsunsr](#)

the first time I tried to remove the end caps from the frame pillars of my new FLSun SR to get at the steppers + pulleys I cracked the plastic on them immediately, so I drafted up a replacement real quick. designed and originally printed in PLA with a 0.2mm layer height, but it's not a particularly demanding model so I'm sure most other plastics should work fine as well. the dimensions may be slightly off, but they're close enough to get into the frame!
