For all you Blackmagic camera people out there (you know who you are). I present, the holy grail. If you're anything like me, you have an unreasonable number of these little Samsung SSD's floating around to fuel your little BMPCC 4K/6K/48K and it's time to clean up!

Stuff 6 Samsung T5 SSD's into 3 x 1 Gridfinity slots. Doneski. That gaping void in your life is now filled.

This model loves SSD's almost as much as it hates your fingers when you're trying to pry out the middle ones. I know part of the design philosophy is easy access but darn it right to heck! I've got too many of these damn things to spread them out!
