A mount for smartphones with a magnetic holder for Renault Zoe R90/R110/Q90/Q210.

(eg. <https://www.amazon.de/Ysnzaq-Motorola-Moto-G100-Kameraschutz-SLJ-Blue/dp/B09KXR1RVH> for my Moto G100).

I had alway issues with comercial magnetic holders, so I have designed on which also uses a formfit.

Many thanks to the original designer of the fork design. It took a long time until I have started with this desinge, because I was not sure how to fix it to the air duct until I have seen his fork design.

You will need a metal screw with 5 mm diameter, 4 small screws M3, screw nuts and 2 neodyne magnets Ø15.

You should use a material which could withstand high temperatures like Extruder GreenTec Pro.
