updated 17. 2. 2023 | published 17. 2. 2023

Summary

A planter shaped like a Pokémon Bulbasaur or Bisasam. Fully scalable. Easy to print.

This Pokémon plant-pot has a lot of 3D surface detail and will decorate your window sill or sideboard or... every place!

Updated Version: STL #2 is modified with an optional drain hole. Still I'm marking this as a reupload since changes aren't substantial.

Fits:

Scale 60%: Every standard 5 cm plant pot. Best to plant a succulent or small plant in it.

Scale 120%: Will fit to any “normal” sized plant pot with around 10 cm diameter.

Lore: Along with Charmander and Squirtle, Bulbasaur is one of three starter Pokémon of Kanto available at the beginning of Pokémon Red, Green, Blue, FireRed, and LeafGreen.

Remark: This model was desined by littlebala and published under CC Attribution Non-Commercial Share Alike.

Printing Recommendations: 0.2 mm layer hight, 15 % infill, 3 perimeters.

The model prints well without supports, but expect a slightly rough surface around the front neck.

Feel free to share and like or just print a whole army of them ;-)

Want a cute watering can for your planter?
