Summary

A fixed 25 degree TPU camera mount for the apex frame.

Tags: [drone](#) [fpv](#) [fpvcameramount](#) [impulserc](#) [impulsercapex](#)

This is really made only for the Foxeer T-rex, however it will possibly work with other 22mm mini cameras where the length from the center of the screws to the lens is 16.5mm or less.

Made for printing in TPU, no extra tolerance on the standoffs for solid filaments.
