Tags: [adapter](#) [anycubic](#) [anycubici3mega](#) [skr2](#)

Even though I re-designed it from scratch, this is pretty much a remix of Michelix's adapter found on Thingiverse <https://www.thingiverse.com/thing:3629440>

This adapter gives room to run cables underneath as well as add a right angle USB adapter.

To install:

Remove your Trigorrilla board (don't forget to label or note your cables first).

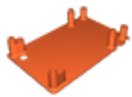

Slide the adapter plate over the metal posts. Use the original M3 screws from the Trigorrilla board to secure the adapter to the frame.

Use four M4 x 8mm wood screws to install the SKR 2 to the adapter plate. You could potentially use four M3 machine screws instead, but I haven't tested it (the screw hole opening is 2mm in size).

Print Settings:

- Filament: Polymaker Polylite PETG, Teal
- Layer height: 0.2
- Perimeters: 2
- Infill: 25%
