Need a pair of cufflinks for your new dress shirt? These knurled cufflinks will get the job done! More designs coming soon!

Printing Tips!

- The post and head may need to be scaled slightly in your slicer. Scaling the head to 105% and the post to 95% works best for me.
- Print the cufflink head face down on a glass bed for a nice, shiny effect!
- If you enable ironing, only add it to the head. Ironing the threads on the post will make them too large and unable to thread.

- No supports needed.
- The cufflink post should be standing up to get the best thread resolution.
