A simple replacement for a showers broken door handle. The particular shower is "Krone - Die Dusche" but due to it's simple design the handle should fit on every glas door which uses a threaded rod that doesn't exceed 4mm in diameter and a nut to hold it.

Print:

Print all three parts in a suitable material (I used PETG in case the handle gets in contact with hot water). 0.2mm Quality or 0.3mm Draft settings should work fine. At the correct orientation no supports are needed.

Have fun printing and let me know if there's something to improve.
