updated 5. 12. 2022 | published 5. 12. 2022

Summary

The Do Nothing Machine was not very smooth without sanding. This is an updated model that improves the smoothness.

The original Do Nothing Machine was not very smooth without sanding. This is an updated model that improves the smoothness. It adds caps to permanently keep the arm on and adds a small ring around the bottom of the puck to keep the arm from catching on the sides.
